DARE TO LISTEN!

DISCOVER EPIC SOUND

CAR AUDIO 2019

SOUND THAT AMPLIFIES LIFE

No one understands the power and beauty of music like JBL. For over 70 years now our award-winning range of audio equipment has enriched the lives of countless people across the globe. The music community depends on JBL for performances, mixes and masters. The rest of the world depends on us to amplify the beauty of their lives. We constantly revolutionize audio technology to bring more clarity, purity and power to the sound and music in live concerts, clubs, homes and even the world's finest automobiles.

UPGRADE TO JBL

Your current car will most likely have a car radio and speakers already.

So why invest money in upgrading your car? The standard radio in your car has limited power. This can easily be heard when listening to your music at higher volumes. Your music will start to sound harsh and distorted. Additionally, your standard speakers are simply not capable of producing real bass.

Replacing your standard speakers with JBL speakers will give your music much more warmth and clarity.

By adding a JBL subwoofer, your music will get richer bass.

Finally, by adding a JBL amplifier, your music will sound better at higher volumes, more dynamically and without distortion.

Installing JBL car audio products isn't as difficult as you might think it is. It only requires some basic skills, our installation manual and the installation tips, which can be found on our website. Also you can of course visit a car audio installer for a truly professional set up. Enjoy your music with the latest JBL car audio line-up.

JBL CAR SPEAKERS

From years of developing professional equipment, and working with car manufacturers, we have mastered the art of great sound. And we bring that same level of audio perfection to car speakers for better depth, clarity, and power. Our car audio systems feature best-in-class technologies that deliver performance you can hear and appreciate. Easily-installed, they are sure to enhance the sound of any car audio system.

JBL

STAGE SERIES

ENTRY LEVEL SPEAKERS

The JBL Stage speakers are specifically designed in mind the bare essentials. Their compact design will enable fitment in almost any car and their rigid cones will make your music sound great.

JBL **CAR SUBWOOFERS**

Our rich experience in developing live stage equipment has helped us in designing subwoofers that are known for their incredible high endurance and reliability.

Whether it's a polypropylene woofer cone to ensure maximum efficiency and performance or a progressive spider cone to provide exceptional control and reduce distortion at the highest output levels, JBL subwoofers outperform anything you may have heard before.

JBL STAGE SERIES

ENTRY LEVEL SUBWOOFERS

Looking for more bass at an entry level price?
The JBL STAGE subwoofers provide the legendary JBL
sound. Whether in a standard enclosure, tube or your
own built cabinet, you'll clearly hear your music
both inside and outside your car.
